Addressing Challenging Moments in Psychotherapy Dec 16 2019 "This practical and helpful volume details how clinicians can work through various and common challenges inherent to psychotherapy, whether within the context of individual, marital, or group settings. Chapters draw upon wisdom gleaned from the author's 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation and favor working in the here-and-now. Along with theory and clinical observations, Dr. Gans offers a series of "Clinical Pearls," pithy comments that highlight different interventions to a wide range of clinical challenges. These include patient hostility, the abrupt termination of therapy,

treating a couple that's lost compassionate neutrality, and more. In addition to offering advice and strategies for therapists, the book also addresses foundational concerns like the matter of fees in private practice and the virtue of moral courage on the part of the therapist. Written with clarity, heart, and an abundance of clinical wisdom, *Challenging Moments in Psychotherapy* is essential reading for all clinicians, teachers, and supervisors of psychotherapy"--

The Early Years, 4-Stroke Engines Make Their Debut Sep 05 2021 This collection is a resource for studying the history of the evolving technologies that have contributed to snowmobiles becoming cleaner and quieter machines. Papers address design for a snowmobile using E10 gasoline (10% ethanol mixed with pump gasoline). Performance technologies that are presented include:

- Engine Design: application of the four-stroke engine
- Applications to address both engine and track noise
- Exhaust After-treatment to reduce emissions

The SAE International Clean Snowmobile Challenge (CSC) program is an engineering design competition. The program provides undergraduate and graduate students the opportunity to enhance their engineering design and project management skills by reengineering a snowmobile to reduce emissions and noise. The competition includes internal combustion engine categories that address both gasoline and diesel, as well as the zero emissions category in which range and draw bar performance are measured. The goal of the competition is designing a cleaner and quieter snowmobile. The competitors' modified snowmobiles are also expected to be cost-effective and comfortable for the operator to drive.

The Curious Case of Miss James Mar 19 2020 Consumption stalks Elizabeth James. At least that's what the doctors from Harley street, the best available in Britain if not the world, say it is. One drop of blood at a time. Her only hope is the clean air, good food, and care of her uncle, Dr Standfast. Life on Barnecourt farm, high on a down in Dartmoor, may be her last chance. A chance that strange, almost human, men threaten. Especially when they scratch at her window in the depths of the night. Strange animals, a dog that walks upright and understands English, stalk the brush. Almost as disturbing, a visitor, a young man, almost literally drops from the sky into her life.

Tunnels and Underground Cities: Engineering and Innovation Meet Archaeology, Architecture and Art

Oct 18 2022 Tunnels and Underground Cities: Engineering and Innovation meet Archaeology, Architecture and Art. Volume 10: Strategic use of underground space for resilient cities contains the contributions presented in the eponymous Technical Session during the World Tunnel Congress 2019 (Naples, Italy, 3-9 May 2019). The use of underground space is continuing to grow, due to global urbanization, public demand for efficient transportation, and energy saving, production and distribution. The growing need for space at ground level, along with its continuous value increase and the challenges of energy saving and achieving sustainable development objectives, demand greater and better use of the underground space to ensure that it supports sustainable, resilient and more liveable cities. The contributions cover a wide range of topics, from investing in urban underground space, via effective use of underground space for sustainable cities, and the use of new energy carriers to the compound use of underground space for integrated campus-urban development. The book is a valuable reference text for tunnelling specialists, owners, engineers, archaeologists, architects, artists and others involved in underground planning, design and building around the world, and for academics who are interested in underground constructions and geotechnics.

Dawn of a New Day Oct 06 2021 Dawn of A New Day is a thrilling, heartbreaking love story that is filled with suspense, drama, and murder. A ruthless killer caused great sadness to a loving family of three. Beth Miller and her twelve-year-old son, Danny, are heartbroken over the death of John Miller, Beth's husband. Young Danny has vowed to kill the person who killed his father. A sheriff's detective named Randy Johnson has been assigned to solve John Miller's murder. He has a daughter named Shelia, who is about Danny's age. Danny disobeys his grandfather's warning for him to stay away from a place named the Wellington house. Harry Spears is a very wealthy man but an extremely shy individual that lives next door to Beth and Danny Miller. With the passing of his wife and now his mother with terminal cancer, he stays inside his home much of the time, saddened and lonely. Marcus Hendrix, a sheriff's deputy and coworker with Randy Johnson, is a single middle-aged man looking for the right lady to be his wife. Doris Thigpen, a widow, has been a nurse for many years, and she never thought that one day, she would meet the man of her dreams. This novel is written for a wide audience—young and old.

Air-Mech-Strike Jul 23 2020 This book outlines how to reorganize the U.S. Army into a fully 2 and 3-Dimensional maneuver capable, ground force with terrain-agile, armored fighting vehicles sized to rapidly deploy by fixed-wing and rotary-wing aircraft to the scene of world conflicts and strike at the heart of freedom's enemies. The plan to build the Army into Air-Mech-Strike Forces, exploiting emerging information-age technologies, as well as America's supremacy in aircraft and helicopter delivery systems---at the lowest cost to the taxpayers, is described in detail. These Army warfighting organizations, using existing and some newly purchased equipment, will shape the battlefield to America's advantage, preserving the peace before it is lost; if not, then

winning fights that must be fought quickly. The dangerous world we live in moves by the speed of the AIR, and the 21st Century U.S. Army 2D/3D combat team will dominate this medium by Air-Mech-Strike!

Circular Economy May 21 2020 This book highlights the notion of Circular Economy under the umbrella of Sustainability because of the widespread momentum it is gaining. Today the whole world is certainly in emergent need of an alternative system to traditional economy which is linear, i.e. make, use and dispose to get rid-off the waste and very important to ensure continuous use of resources, which is possible by the advent of circular economy. A circular economy aims to utilize the resources in use for as long as possible, extract the maximum value from them during use, then recover and regenerate products and materials at the end of each service life vis-à-vis traditional linear model. This book discusses circular economy in terms of assessment with various case studies.
