This textbook explores probability and stochastic processes at a level that does not require any prior knowledge except basic calculus. It presents the fundamental concepts in a step-by-step manner, and offers remarks and warnings for deeper insights. The chapters include basic examples, which are revisited as the new concepts are introduced. To aid learning, figures and diagrams are used to help readers grasp the concepts, and the solutions to the exercises and problems. Further, a table format is also used where relevant for better comparison of the ideas and formulae. The first part of the book introduces readers to the essentials of probability, including combinatorial

analysis, conditional probability, and discrete and continuous random variable. The second part then covers fundamental stochastic processes, including point, counting, renewal and regenerative processes, the Poisson process, Markov chains, queuing models and reliability theory. Primarily intended for undergraduate engineering students, it is also useful for graduate-level students wanting to refresh their knowledge of the basics of probability and stochastic processes. Presents an illustrative treatment of the testing techniques of soils in the laboratory and field for determination of engineering properties. Twenty-four select lab-based experiments are included on the various aspects of soil mechanics. "Roby's highly engaging prose offers edgy characters and intense drama." - Booklist It's been four years since twenty-eight-year old Alicia Black, daughter of Reverend Curtis Black, divorced her second husband, the most womanizing and corrupt man she has ever known. Since then, Alicia has been dating her first husband, Phillip Sullivan, a wonderfully kind and true man of God whom she'd hurt terribly by cheating on him. Alicia has worked hard to prove herself worthy of his trust once more, and when he asks her to marry him again, she couldn't be happier. But Levi Cunningham, the drug dealer Alicia had an extramarital affair with, has just been released from prison, and he has completely turned his life around for the better. Still head-over-heels in love with Alicia, he will do whatever is necessary to win her back. Remarrying Phillip is the one thing Alicia has wanted for years, but she can't get Levi out of her mind. Alicia and Phillip aren't the only ones in the middle of a crisis. Their best friends, husband and wife Brad and Melanie Richardson, are struggling to keep their marriage together. Workaholic Brad is never home and has begun losing thousands on bad investments. Or so he says. Melanie, who is certain there's more to the story, is determined to get at the truth. Fresh betrayal leads to consequences no one saw coming, and Alicia's relationship with Phillip might

Now in its sixth edition, Soil Mechanics Laboratory Manual is designed for the junior-level soil mechanics/geotechnical engineering laboratory course in civil engineering programs. It includes eighteen laboratory procedures that cover the essential properties of soils and their behavior under stress and strain, as well as explanations, procedures, sample calculations, and completed and blank data sheets. Written by Braja M. Das, respected author of market-leading texts in geotechnical and foundation***

engineering, this unique manual provides a detailed discussion of standard soil classification systems used by engineers: the AASHTO Classification System and the Unified Soil Classification System, which both conform to recent ASTM specifications. To improve ease and accessibility of use, this new edition includes not only the stand-alone version of the Soil Mechanics Laboratory Test software but also ready-made Microsoft Excel(r) templates designed to perform the same calculations. With the convenience of point and click data entry, these interactive programs can be used to collect, organize, and evaluate data for each of the book's eighteen labs. The resulting tables can be printed with their corresponding graphs, creating easily generated reports that display and analyze data obtained from the manual's laboratory tests. Features . Includes sample calculations and graphs relevant to each laboratory test . Supplies blank tables (that accompany each test) for laboratory use and report preparation . Contains a complete chapter on soil classification (Chapter 9) . Provides references and three useful appendices: Appendix A: Weight-Volume Relationships Appendix B: Data Sheets for Laboratory Experiments Appendix C: Data Sheets for Preparation of Laboratory Reports" Classical and Modern Direction of Arrival Estimation contains both theory and practice of direction finding by the leading researchers in the field. This unique blend of techniques used in commercial DF systems and state-of-the art super-

resolution methods is a valuable source of information for both practicing engineers and researchers. Key topics covered are: Classical methods of direction finding Practical DF methods used in commercial systems Calibration in antenna arrays Array mapping, fast algorithms and wideband processing Spatial time-frequency distributions for DOA estimation DOA estimation in threshold region Higher order statistics for DOA estimation Localization in sensor networks and direct position estimation Brings together in one book classical and modern DOA techniques, showing the connections between them Contains contributions from the leading people in the field Gives a concise and easy- to- read introduction to the classical techniques Evaluates the strengths and weaknesses of key super-resolution techniques Includes applications to sensor networks This book offers a comprehensive reference guide to the latest developments and advances in solar drying technology, covering the concept, design, testing, modeling, and economics of solar drying technologies, as well as their impact on the environment. The respective chapters are based on the latest studies conducted by reputed international researchers in the fields of solar energy and solar drying. Offering a perfect blend of research and practice explained in a simple manner, the book represents a valuable resource for researchers, students, professionals, and policymakers working in the field of solar drying and related agricultural

applications. This early work by R. G. Collingwood was originally published in 1922 and we are now republishing it with a brand new introductory biography. 'Roman Britain' is an informative work on Roman Britain and includes chapters on 'Town and Country Life', 'Art and Language', 'Religion', and much more. Robin George Collingwood was born on 22nd February 1889, in Cartmel, England. He was the son of author, artist, and academic, W. G. Collingwood. He was greatly influenced by the Italian Idealists Croce, Gentile, and Guido de Ruggiero. Another important influence was his father, a professor of fine art and a student of Ruskin. He published many works of philosophy, such as Speculum Mentis (1924), An Essay on Philosophic Method (1933), and An Essay on Metaphysics (1940). Reproduction of the original: Historic Highways of America by Archer Butler Hulbert This book takes science fiction in a totally new direction, with a unique story that you've never encountered. A family is sent to colonize a newly discovered planet which turns out to be unlike any other world ever discovered. Young Irvana finds that the planet changes her in ways she never could have imagined, and gives her abilities that will change the universe. For children and teens age 10-16. Color illustrations. concise assessment of the risks to human health and the environment posed by exposure to 1,2-diaminoethane. Commonly known as ethylenediamine (EDA), this compound is used as an intermediate in the manufacture of tetraacetyl ethylenediamine ethylenediaminetetraacetic acid (EDTA) organic flocculants urea resins and fatty bisamides. Its use in photography chemicals may also contribute to its presence in the environment. Concerning environmental behavior, studies indicate rapid biodegradation; bioaccumulation is judged unlikely. Although data on environmental levels and human exposure are extremely limited, the report notes that the production of formulations using EDA usually takes place in well-ventilated enclosed systems thus reducing the potential for occupational exposure via inhalation. Studies conducted in experimental animals show moderate acute toxicity. Findings support the conclusion that EDA is a skin irritant and a skin sensitizer. Data were judged inadequate to support an assessment of mutagenic potential. The report found no evidence of carcinogenicity in animal studies. Although non-neoplastic effects on the liver have been reported, the significance of these findings for human health remains uncertain. Includes the annual report of the provincial auditor. This volume addresses major evolutionary changes that took place during the Mesozoic and the Cenozoic. These include discussions on major evolutionary radiations and ecological

innovations on land and at sea, such as the Mesozoic marine revolution, the Mesozoic radiation of vertebrates, the Mesozoic lacustrine revolution, the Cenozoic radiation of mammals, the evolution of paleosol biotas, and the evolution of hominins. The roles of mass extinctions at the end of the Triassic and at the end of the Cretaceous are assessed. This volume set provides innovative reviews of the major evolutionary events in the history of life from an ichnologic perspective. Because the long temporal range of trace fossils has been commonly emphasized, biogenic structures have been traditionally overlooked in macroevolution. However, comparisons of ichnofaunas through geologic time do reveal the changing ecology of organism-substrate interactions. The use of trace fossils in evolutionary paleoecology represents a new trend that is opening a window for our understanding of major evolutionary radiations and mass extinctions. Trace fossils provide crucial evidence for the recognition of spatial and temporal patterns and processes associated with paleoecologic breakthroughs. For courses in First-year Russian Introductory Russian, Basic Russian, Basic Intensive Russian, and Intermediate Russian. Golosa is a two-volume, communicative approach to Russian that is designed to help students reach the ACTFL Intermediate range in speaking and Intermediate High in reading and listening. Each volume of Golosa includes a main textbook, a student workbook with

laboratory drills and written exercises, and an audio program that runs approximately ten hours per volume and includes listening comprehension exercises, dialogs, conversations, and rapid-pace oral drills. Each unit in the program revolves around a topic (university, family, etc.), and follows the same basic format: introduction of basic vocabulary for the topic, listening to introductory conversations, short dialogs with activization exercises and role-play practice, practice in listening and reading with emphasis on strategies, grammar study and practice in both oral and written form, and written workbook exercises that go from mechanical to creative. NEW! Book I offers a CD-ROM with lexical and grammatical exercises for each unit! This book offers an original contribution towards a new theory of intersubjectivity which places ethics of breath, hospitality and non-violence in the forefront. Emphasizing Indian philosophy and religion (Vedas and Upanishads) and related cross-cultural interpretations, it provides new intercultural interpretations of key Western concepts which traditionally were developed and followed in the vein of re-conceptualizations or revitalizations of Greek thought, as in Nietzsche and Heidegger, for example. The significance of the book lies in its establishment of a new platform for thinking philosophically about intersubjectivity, so as to nudge contemporary philosophy towards a more sensitive approach, which is needed in our times. Its originality lies in its

innovative approach, which searches for the origin of ethical gestures (represented in respecting the breath/breathing) through the newly introduced concept of "mesocosm" as a space of a ritual, or a new ethical space of intersubjective encounters. The book also introduces the possibility of an original ethics based on breath. Intended for philosophers, feminists and others concerned with intercultural philosophy and comparative religion, the book will appeal to readers interested in contemporary ethical and political theories of peaceful conflict resolution and concepts of hospitality. A Breath of Hospitality will benefit all who seek a more sensitive approach in philosophy, including philosophy of religion, and often-neglected practical and educational layers of our everyday intersubjective relations.
