Families Caring for an

Aging America Nov 14 2019
Family caregiving affects millions of Americans every day, in all walks of life. At least 17.7 million individuals in the United States are caregivers of an older adult with a health or functional limitation. The nation's family caregivers provide the lion's share of long-term care for our older adult population. They are also central to older adults' access to and receipt of health care and community-based social services. Yet the need to recognize and support caregivers is among the least appreciated challenges facing the aging U.S. population. Families Caring for an Aging America examines the prevalence and nature of family caregiving of older adults and the available evidence on the effectiveness of programs, supports, and other interventions designed to support family caregivers. This report also assesses and recommends policies to address the needs of family caregivers and to minimize the barriers that they encounter in

trying to meet the needs of older adults.

Mental Health Effects of COVID-19 Aug 24 2020
The physical effects of COVID-19 are felt globally. However, one issue that has not been sufficiently addressed is the impact of COVID-19 on mental health. During the COVID-19 pandemic, citizens worldwide are enduring widespread lockdowns; children are out of school; and millions have lost their jobs, which has caused anxiety, depression, insomnia, and distress. Mental Health Effects of COVID-19 provides a comprehensive analysis of mental health problems resulting from COVID-19, including depression, suicidal thoughts and attempts, trauma, and PTSD. The book includes chapters detailing the impact of COVID-19 on the family's well-being and society dynamics. The book concludes with an explanation on how meditation and online treatment methods can be used to combat the effects on mental health. Discusses family dynamics, domestic violence,

and aggression due to COVID-19 Details the psychological impact of COVID-19 on children and adolescents Includes key information on depression, anxiety, and suicide as a result of COVID-19

Aging in Rural Canada Sep 17 2022

The Handbooks of Aging Oct 06 2021

Remaking Retirement Oct 14 2019 Around the world, people nearing and entering retirement are holding ever-greater levels of debt than in the past. This is not a benign situation, as many pre-retirees and retirees are stressed about their indebtedness. Moreover, this growth in debt among the older population may render retirees vulnerable to financial shocks, medical care bills, and changes in interest rates. Contributors to this volume explore key aspects of the rise in debt across older cohorts, drill down into the types of debt and reasons for debt incurred by the older population, and review policies to remedy some of the financial

problems facing older persons, in the US and elsewhere. The authors explore which groups are most affected by debt and identify the factors producing this important increase in leverage at older ages. It is clear that the economic and market environment is influential when it comes to saving and debt. Access to easy borrowing, low interest rates, and the rising cost of education have had significant impacts on how much people borrow, and how much debt they carry at older ages. In this environment, the capacity to manage debt is ever more important as older workers lack the opportunity to recover from mistakes.

How Men Age Nov 07 2021 A groundbreaking book that examines all aspects of male aging through an evolutionary lens While the health of aging men has been a focus of biomedical research for years, evolutionary biology has not been part of the conversation—until now. *How Men Age* is the first book to explore how natural selection

has shaped male aging, how evolutionary theory can inform our understanding of male health and well-being, and how older men may have contributed to the evolution of some of the very traits that make us human. In this informative and entertaining book, renowned biological anthropologist Richard Bribiescas looks at all aspects of male aging through an evolutionary lens. He describes how the challenges males faced in their evolutionary past influenced how they age today, and shows how this unique evolutionary history helps explain common aspects of male aging such as prostate disease, loss of muscle mass, changes in testosterone levels, increases in fat, erectile dysfunction, baldness, and shorter life spans than women. Bribiescas reveals how many of the physical and behavioral changes that we negatively associate with male aging may have actually facilitated the emergence of positive traits that have helped make humans so successful as a species,

including parenting, long life spans, and high fertility. Popular science at its most compelling, *How Men Age* provides new perspectives on the aging process in men and how we became human, and also explores future challenges for human evolution—and the important role older men might play in them.

Ageless Soul Apr 12 2022
Thomas Moore is the renowned author of *Care of the Soul*, the classic #1 New York Times bestseller. In *Ageless Soul*, Moore reveals a fresh, optimistic, and rewarding path toward aging, one that need not be feared, but rather embraced and cherished. In Moore's view, aging is the process by which one becomes a more distinctive, complex, fulfilled, loving, and connected person. Using examples from his practice as a psychotherapist and teacher who lectures widely on the soul of medicine and spirituality, Moore argues for a new vision of aging: as a dramatic series of initiations, rather than a diminishing experience, one

that each of us has the tools—experience, maturity, fulfillment—to live out. Subjects include: *Why melancholy is a natural part of aging, and how to accept it, rather than confuse it with depression *The vital role of the elder and mentor in the lives of younger people *The many paths of spiritual growth and learning that open later in life *Sex and sensuality *Building new communities and leaving a legacy Ageless Soul will teach readers how to embrace the richness of experience and how to take life on, accept invitations to new vitality, and feel fulfilled as they get older.

Naked at Our Age Feb 16 2020

In *Naked at Our Age*, women and men, coupled and single, straight and gay talk candidly about how their sex lives and relationships have changed with age, and about how they see themselves, their partners, or their single life. Many of them are having unsatisfying sex, or no sex at all, and are seeking advice. Price presents their personal stories, and

follows up with tips from sex therapists, health professionals, counselors, sex educators, and other knowledgeable experts. *Naked at Our Age* is an entertaining and indispensable guide to handling and understanding the issues of senior sex and relationships.

Molecular and Cellular Gerontology Sep 24 2020 This work covers a number of relevant aspects of the molecular and cellular biology of ageing, a timely general topic highlighted by the United Nations' having declared 1999 the Year of the Elderly. The papers published here represent a wide range of complementary research areas: molecular and cellular aspects; theories of ageing; molecular basis of the loss of homeostatic maintenance mechanisms; lower and higher model organisms including transgenic animal models; the genetics of human longevity; clinical and molecular aspects of age-related diseases; and integrated systems like brain and immune system aging. It is

hoped that the additions to knowledge of the molecular mechanisms of ageing provided by this volume may ultimately lead to the prevention of age-related diseases.

Fountain of Age Dec 28 2020

Betty Friedan launches a new revolution with this powerful, bestselling book breaking through the American mystique of aging as decline. Through hundreds of interviews, Friedan confronts our denial and demolishes society's compassionate contempt--to offer a vision of what can be embraced.

Getting Your Affairs in

Order Jan 17 2020

Aging Thoughtfully Aug 16 2022 We all age differently, but we can learn from shared experiences and insights. The conversations, or paired essays, in *Aging Thoughtfully* combine a philosopher's approach with a lawyer-economist's. Here are ideas about when to retire, how to refashion social security to help the elderly poor, how to learn from King Lear -- who did not retire successfully -- and

whether to enjoy or criticize anti-aging cosmetic procedures. Some of the concerns are practical: philanthropic decisions, relations with one's children and grandchildren, the purchase of annuities, and how to provide for care in old age. Other topics are cultural, ranging from the treatment of aging women in a Strauss opera and various popular films, to a consideration of Donald Trump's (and other men's) marriages to much younger women. These engaging, thoughtful, and often humorous exchanges show how stimulating discussions about our inevitable aging can be, and offer valuable insight into how we all might age more thoughtfully, and with zest and friendship.

Disability and Aging Jun 02

2021 What is the lived experience of previously healthy older adults as they face disability in late life, and how is disability assimilated in their identity? How do prevailing practices facilitate or limit options for

elders living with new disabilities? To address these questions, Jeffrey Kahana and Eva Kahana uniquely synthesize disability and gerontological perspectives to explore both the unfolding challenges of aging and the practices and policies that can enhance the lives of older adults. Jeffrey S. Kahana is associate professor of history and codirector of the Center on Aging and Policy at Mount Saint Marry College. Eva Kahana is Distinguished University Professor and Pierce T. and Elizabeth D. Robson Professor of the Humanities at Case Western Reserve University, where she also is director of the Elderly Care Research Center.

Crossroads at Midlife May 13 2022 With medical science, health care, and healthy lifestyles extending our lifespans as never before, more and more midlife adults are finding themselves caring for their aging parents. This role can trigger not only logistical and financial challenges, but also great emotional upheaval.

There is a reversal of roles as the child--often in the midst of raising his or her own adolescent or young adult offspring--becomes the caretaker of the parent. A parent's aging and mortality elicits strong feelings of loss, and a stark realization of one's own aging and mortality. Past, present, and future paths converge, and the caretaker is at the center of that crossroads. Psychologist Praver--a specialist working with such caretakers--shows us their inner worlds, and how they used a difficult point in their lives to embark on a journey of self-understanding and self-transformation--a journey toward a more meaningful life for themselves. Readers can gain a better understanding of their own lives-- and know they are not alone in their struggles to contend with and find powerful benefits from the emotional side of caring for an aging parent. Distress can become peace of mind, as we see in the stories of men and women who sought Praver's help.

Relationships that might be weakened by a caretaker role--relationships between caretakers and their children, spouses, and friends--can actually grow stronger with the experience. Profound issues affecting caretakers are shared in this evocative book, which is an enlightening and enjoyable read.

Population Aging Nov 19 2022

Elder Mistreatment Oct 26 2020 Since the late 1970s when Congressman Claude Pepper held widely publicized hearings on the mistreatment of the elderly, policy makers and practitioners have sought ways to protect older Americans from physical, psychological, and financial abuse. Yet, during the last 20 years fewer than 50 articles have addressed the shameful problem that abusers--and sometimes the abused themselves--want to conceal. *Elder Mistreatment in an Aging America* takes a giant step toward broadening our understanding of the mistreatment of the elderly and

recommends specific research and funding strategies that can be used to deepen it. The book includes a discussion of the conceptual, methodological, and logistical issues needed to create a solid research base as well as the ethical concerns that must be considered when working with older subjects. It also looks at problems in determination of a report's reliability and the role of physicians, EMTs, and others who are among the first to recognize situations of mistreatment. *Elder Mistreatment in an Aging America* will be of interest to anyone concerned about the elderly and ways to intervene when abuse is suspected, including family members, caregivers, and advocates for the elderly. It will also be of interest to researchers, research sponsors, and policy makers who need to know how to advance our knowledge of this problem.

Annual Review of Gerontology and Geriatrics, Volume 21, 2001 Mar 31 2021 Presenting the latest research in the

biology of aging, this volume addresses important theoretical issues focusing on the basis for why humans live as long as they do. Expert authors combine three general paradigms of aging research: demographic studies, evolutionary studies, and studies of biological mechanisms. Topics explored include: Why does aging occur? Cellular aging Models in aging research Modern approaches to the mechanisms of aging The genetics of behavioral aging

Shock of Gray Dec 08 2021 In "Shock of Gray," Ted Fishman explains the astounding economic and political changes we face as our world suddenly grows old.

Issues Affecting Aging and Elderly Individuals with an Intellectual Impairment Jan 09 2022

Aging Our Way Jul 03 2021 Elders 85 years and older are the fastest growing segment of the population in the U.S. and in many other countries. *Aging Our Way* examines how the very old navigate the

challenges of loneliness, disability, and loss, while staying healthy, connected, and comfortable.

Aging in the Global South

Feb 22 2023 This book explores how the forces of development have shaped the experience of aging in countries in the global south. It points to the challenges and opportunities that lie in developing innovative, sustainable programs to support elderly care services.

Social Isolation and Loneliness in Older Adults

May 21 2020 Social isolation and loneliness are serious yet underappreciated public health risks that affect a significant portion of the older adult population. Approximately one-quarter of community-dwelling Americans aged 65 and older are considered to be socially isolated, and a significant proportion of adults in the United States report feeling lonely. People who are 50 years of age or older are more likely to experience many of the risk factors that can cause or exacerbate social isolation or

loneliness, such as living alone, the loss of family or friends, chronic illness, and sensory impairments. Over a life course, social isolation and loneliness may be episodic or chronic, depending upon an individual's circumstances and perceptions. A substantial body of evidence demonstrates that social isolation presents a major risk for premature mortality, comparable to other risk factors such as high blood pressure, smoking, or obesity. As older adults are particularly high-volume and high-frequency users of the health care system, there is an opportunity for health care professionals to identify, prevent, and mitigate the adverse health impacts of social isolation and loneliness in older adults. *Social Isolation and Loneliness in Older Adults* summarizes the evidence base and explores how social isolation and loneliness affect health and quality of life in adults aged 50 and older, particularly among low income, underserved, and vulnerable populations. This report makes

recommendations specifically for clinical settings of health care to identify those who suffer the resultant negative health impacts of social isolation and loneliness and target interventions to improve their social conditions. *Social Isolation and Loneliness in Older Adults* considers clinical tools and methodologies, better education and training for the health care workforce, and dissemination and implementation that will be important for translating research into practice, especially as the evidence base for effective interventions continues to flourish.

Social Ecology in the Digital Age Mar 11 2022 *Social Ecology in the Digital Age: Solving Complex Problems in a Globalized World* provides a comprehensive overview of social ecological theory, research, and practice. Written by renowned expert Daniel Stokols, the book distills key principles from diverse strands of ecological science, offering a robust framework for transdisciplinary research and

societal problem-solving. The existential challenges of the 21st Century - global climate change and climate-change denial, environmental pollution, biodiversity loss, food insecurity, disease pandemics, inter-ethnic violence and the threat of nuclear war, cybercrime, the Digital Divide, and extreme poverty and income inequality confronting billions each day - cannot be understood and managed adequately from narrow disciplinary or political perspectives. Social Ecology in the Digital Age is grounded in scientific research but written in a personal and informal style from the vantage point of a former student, current teacher and scholar who has contributed over four decades to the field of social ecology. The book will be of interest to scholars, students, educators, government leaders and community practitioners working in several fields including social and human ecology, psychology, sociology, anthropology, criminology, law, education, biology, medicine,

public health, earth system and sustainability science, geography, environmental design, urban planning, informatics, public policy and global governance. Winner of the 2018 Gerald L. Young Book Award from The Society for Human Ecology "Exemplifying the highest standards of scholarly work in the field of human ecology."
<https://societyforhumanecology.org/human-ecology-homepage/awards/gerald-l-young-book-award-in-human-ecology/> The book traces historical origins and conceptual foundations of biological, human, and social ecology Offers a new conceptual framework that brings together earlier approaches to social ecology and extends them in novel directions Highlights the interrelations between four distinct but closely intertwined spheres of human environments: our natural, built, sociocultural, and virtual (cyber-based) surroundings Spans local to global scales and individual, organizational,

community, regional, and global levels of analysis Applies core principles of social ecology to identify multi-level strategies for promoting personal and public health, resolving complex social problems, managing global environmental change, and creating resilient and sustainable communities Underscores social ecology's vital importance for understanding and managing the environmental and political upheavals of the 21st Century Highlights descriptive, analytic, and transformative (or moral) concerns of social ecology Presents strategies for educating the next generation of social ecologists emphasizing transdisciplinary, team-based, translational, and transcultural approaches

Old Age Feb 10 2022 Vanity Fair columnist Michael Kinsley escorts his fellow Boomers through the door marked "Exit." The notorious baby boomers—the largest age cohort in history—are approaching the end and starting to plan their final

moves in the game of life. Now they are asking: What was that all about? Was it about acquiring things or changing the world? Was it about keeping all your marbles? Or is the only thing that counts after you're gone the reputation you leave behind? In this series of essays, Michael Kinsley uses his own battle with Parkinson's disease to unearth answers to questions we are all at some time forced to confront. "Sometimes," he writes, "I feel like a scout from my generation, sent out ahead to experience in my fifties what even the healthiest Boomers are going to experience in their sixties, seventies, or eighties." This surprisingly cheerful book is at once a fresh assessment of a generation and a frequently funny account of one man's journey toward the finish line. "The least misfortune can do to make up for itself is to be interesting," he writes. "Parkinson's disease has fulfilled that obligation."

Age-Friendly Cities and Communities in International Comparison Jan 21 2023 The

supportive role of urban spaces in active aging is explored on a world scale in this unique resource, using the WHO's Age-Friendly Cities and Community model. Case studies from the U.S., Canada, Australia, Hong Kong, and elsewhere demonstrate how the model translates to fit diverse social, political, and economic realities across cultures and continents, ways age-friendly programs promote senior empowerment, and how their value can be effectively assessed. Age-friendly criteria for communities are defined and critiqued while extensive empirical data describe challenges as they affect elders globally and how environmental support can help meet them. These chapters offer age-friendly cities as a corrective to the overemphasis on the medical aspects of elders' lives, and should inspire new research, practice, and public policy. Included in the coverage: A critical review of the WHO Age-Friendly Cities Methodology and its implementation.

Seniors' perspectives on age-friendly communities. The implementation of age-friendly cities in three districts of Argentina. Age-friendly New York City: a case study. Toward an age-friendly European Union. Age-friendliness, childhood, and dementia: toward generationally intelligent environments. With its balance of attention to universal and culture-specific concerns, Age-Friendly Cities and Communities in International Comparison will be of particular interest to sociologists, gerontologists, and policymakers. "Given the rapid adoption of the age-friendly perspective, following its development by the World Health Organization, the critical assessment offered in this volume is especially welcome". Professor Chris Phillipson, University of Manchester

The Age of Dignity Nov 26 2020 One of Time's 100 most influential people "shines a new light on the need for a holistic approach to caregiving in America . . . Timely and

hopeful” (Maria Shriver). In *The Age of Dignity*, thought leader and activist Ai-jen Poo offers a wake-up call about the statistical reality that will affect us all: Fourteen percent of our population is now over sixty-five; by 2030 that ratio will be one in five. In fact, our fastest-growing demographic is the eighty-five-plus age group—over five million people now, a number that is expected to more than double in the next twenty years. This change presents us with a new challenge: how we care for and support quality of life for the unprecedented numbers of older Americans who will need it. Despite these daunting numbers, Poo has written a profoundly hopeful book, giving us a glimpse into the stories and often hidden experiences of the people—family caregivers, older people, and home care workers—whose lives will be directly shaped and reshaped in this moment of demographic change. *The Age of Dignity* outlines a road map for how we can become a more caring nation, providing

solutions for fixing our fraying safety net while also increasing opportunities for women, immigrants, and the unemployed in our workforce. As Poo has said, “Care is the strategy and the solution toward a better future for all of us.” “Every American should read this slender book. With luck, it will be the future for all of us.” —Gloria Steinem
“Positive and inclusive.” —The New York Times
“A big-hearted book [that] seeks to transform our dismal view of aging and caregiving.” —Ms. magazine
[I’ll Be Seeing You](#) Jun 21 2020
The beloved New York Times bestselling author tells the poignant love story of caring for her parents in their final years in this beautifully written memoir. “I’ll Be Seeing You moved me and broadened my understanding of the human condition.”—Wally Lamb, author of *I Know This Much Is True*
Elizabeth Berg’s father was an Army veteran who was a tough man in every way but one: He showed a great deal of love and tenderness to his wife. Berg describes her parents’

marriage as a romance that lasted for nearly seventy years; she grew up watching her father kiss her mother upon leaving home, and kiss her again the instant he came back. His idea of when he should spend time away from her was never. But then Berg's father developed Alzheimer's disease, and her parents were forced to leave the home they loved and move into a facility that could offer them help. It was time for the couple's children to offer, to the best of their abilities, practical advice, emotional support, and direction—to, in effect, parent the people who had for so long parented them. It was a hard transition, mitigated at least by flashes of humor and joy. The mix of emotions on everyone's part could make every day feel like walking through a minefield. Then came redemption. *I'll Be Seeing You* charts the passage from the anguish of loss to the understanding that even in the most fractious times, love can heal, transform, and lead to graceful—and

grateful—acceptance. *Ethics, Law, and Aging Review*, Volume 7 Feb 27 2021 Health care and human service professionals often experience anxiety about potential adverse legal repercussions for actions taken or not taken in the course of caring for patients or clients. In this volume, professionally distinguished and diverse authors discuss both the real and perceived legal liability context within which health and human service delivery to older persons takes place. The benefits and costs of litigious, legislative, and regulatory interventions on the quality of care and the quality of life for recipients of geriatric services is evaluated. Most important, chapters present suggestions for ways to effectively reduce or manage legal risks and anxieties while improving patient care. This volume fills a gap in the literature by providing careful and accurate analysis of legal issues rarely translated into practical and useful advice for health care and human service

professionals.

The Problem of Alzheimer's Jun

14 2022 A definitive and compelling book on one of today's most prevalent illnesses. In 2020, an estimated 5.8 million Americans had Alzheimer's, and more than half a million died because of the disease and its devastating complications. 16 million caregivers are responsible for paying as much as half of the \$226 billion annual costs of their care. As more people live beyond their seventies and eighties, the number of patients will rise to an estimated 13.8 million by 2050. Part case studies, part meditation on the past, present and future of the disease, *The Problem of Alzheimer's* traces Alzheimer's from its beginnings to its recognition as a crisis. While it is an unambiguous account of decades of missed opportunities and our health care systems' failures to take action, it tells the story of the biomedical breakthroughs that may allow Alzheimer's to finally be prevented and treated by medicine and also

presents an argument for how we can live with dementia: the ways patients can reclaim their autonomy and redefine their sense of self, how families can support their loved ones, and the innovative reforms we can make as a society that would give caregivers and patients better quality of life. Rich in science, history, and characters, *The Problem of Alzheimer's* takes us inside laboratories, patients' homes, caregivers' support groups, progressive care communities, and Jason Karlawish's own practice at the Penn Memory Center.

[The Short Guide to Aging and Gerontology](#) Aug 04 2021 *The Short Guide to Aging and Gerontology* provides a concise and authoritative overview of key issues related to age, including how old age has been viewed historically and across cultures, what we know about health and function in later life, and how older age is financed throughout the world, among other questions. Also including current research on policy and practice and detailed

suggestions for further reading, it is an important resource both for anyone new to gerontology as well as established scholars and practitioners in the field.

Such a Fun Age Sep 05 2021

A Best Book of the Year: The Washington Post • Chicago Tribune • NPR • Vogue • Elle • Real Simple • InStyle • Good Housekeeping • Parade • Slate • Vox • Kirkus Reviews • Library Journal • BookPage Longlisted for the 2020 Booker Prize An Instant New York Times Bestseller A Reese's Book Club Pick "The most provocative page-turner of the year." --Entertainment Weekly "I urge you to read Such a Fun Age." --NPR A striking and surprising debut novel from an exhilarating new voice, *Such a Fun Age* is a page-turning and big-hearted story about race and privilege, set around a young black babysitter, her well-intentioned employer, and a surprising connection that threatens to undo them both. Alix Chamberlain is a woman who gets what she wants and has made a living, with her

confidence-driven brand, showing other women how to do the same. So she is shocked when her babysitter, Emira Tucker, is confronted while watching the Chamberlains' toddler one night, walking the aisles of their local high-end supermarket. The store's security guard, seeing a young black woman out late with a white child, accuses Emira of kidnapping two-year-old Briar. A small crowd gathers, a bystander films everything, and Emira is furious and humiliated. Alix resolves to make things right. But Emira herself is aimless, broke, and wary of Alix's desire to help. At twenty-five, she is about to lose her health insurance and has no idea what to do with her life. When the video of Emira unearths someone from Alix's past, both women find themselves on a crash course that will upend everything they think they know about themselves, and each other. With empathy and piercing social commentary, *Such a Fun Age* explores the stickiness of transactional relationships,

what it means to make someone "family," and the complicated reality of being a grown up. It is a searing debut for our times.

[Are You There God? It's Me, Margaret](#) Apr 19 2020 The beloved coming-of-age novel from the author whose "name has long been synonymous with young adult fiction" (Los Angeles Times). "Are You There God? It's Me Margaret is very special." —Amy Poehler (Vulture) "Generations of teenage girls have grown up reading the tales of teenage angst told by beloved author Judy Blume." —Mashable Margaret Simon, almost twelve, has just moved from New York City to the suburbs, and she's anxious to fit in with her new friends. When she's asked to join a secret club she jumps at the chance. But when the girls start talking about boys, bras, and getting their first periods, Margaret starts to wonder if she's normal. There are some things about growing up that are hard for her to talk about, even with her friends. Lucky for Margaret, she's got

someone else to confide in . . . someone who always listens. "The first Judy Blume books I read. . . served as a kind of introduction to myself." —John Green quoted in The New York Times "Mention Judy Blume to almost any woman under a certain age and you're likely to get this reaction: Her face lights up, and she's transported back to her childhood self — curled up with a book she knows will speak directly to her anxieties about relationships, self-image and measuring up." —NPR "Fans, readers, booksellers — even other authors and celebrities — often dissolve into tears upon meeting [Judy Blume], confessing that books like "Forever ... " and "Are You There, God? It's Me, Margaret" got them through adolescence; taught them about sex, love and friendship; and provided their first glimpse of adulthood." —The New York Times "Blume wasn't the first writer to legitimize and celebrate the interior life of young girls. . . . But Blume's work feels significantly more

influential than that of her predecessors and peers.” —The New Yorker “These stories belong to young women. Real young women.” —Diablo Cody, *Entertainment Weekly*

Ethics, Law, And Aging Review, *Volume 8* Dec 20 2022

cs.hlth.cmmhlth
Ageing and Place May 01 2021
During recent years, an increasing amount of academic research has focused on older people with a particular emphasis on settings, places and spaces. This book provides a comprehensive review of research and the policy area of 'ageing and place'. An insightful book on an important topic, Andrews and Phillips have together edited a valuable information and reference source for those with interests in the spatial dimensions of ageing in the twenty-first century. Ranging from macro-scale perspectives on the distribution of older populations on national scales, to the meaning of specific local places and settings to older individuals, on the micro-scale, the book spans an entire range

of research traditions and international perspectives. *Ethics, Law, And Aging Review*, *Volume 8* Jan 29 2021
Perplexing ethical questions emerge when conducting research involving older adult participants. Fundamental ethical concerns often grappled with include the ability to obtain truly voluntary and competent informed consent, the proper role of surrogate decision making in the research context, and the equitable selection of research subjects. This volume brings to the forefront a discussion of how to encourage essential research specifically designed to benefit older persons while protecting the legal and ethical rights of actual and potential older research participants. Highly qualified and diverse contributors analyze and explain some of the most salient and legal conundrums implicated in the design, conduct, interpretation, and application of research protocols that touch on these problems of aging and the aged.

Aging Oct 18 2022 Presenting current research in an innovative text-reader format, *Aging: Concepts and Controversies, Ninth Edition* encourages students to become involved and take an informed stand on the major aging issues we face as a society. Not simply a summary of research literature, Harry R. Moody and Jennifer R. Sasser's text focuses on controversies and questions, rather than on assimilating facts or arriving at a single "correct" view about aging and older people. Drawing on their extensive expertise, the authors first provide an overview of aging in three domains: aging over the life course, health care, and the socioeconomic aspects of aging. Each section is followed by a series of edited readings, offering different perspectives from experts and specialists on that subject. New readings focus on whether current federal spending on the elderly is sustainable and fair to other groups, how older consumers are reshaping the business landscape, and the challenges

of marketing and selling to customers 60 and over. More emphasis is placed on how social class and inequality earlier in life can shape our final years and the number of older Americans living in poverty. The section on Aging and Health Care has been thoroughly updated to reflect the latest data about chronic diseases that affect the elderly, government spending on health care, and policy changes to programs like Medicaid and Medicare. The section on the Social and Economic Outlook for an Aging Society gives the most current picture of the racial and ethnic diversity of older Americans, their participation in the labor force, and their income and wealth.
