*Fostering Change in Institutions, Environments, and People* May 12 2022 This volume is comprised of contributions from leading scholars in education and psychology. In part one of the book the authors provide insight into the psychology of change, examining: What factors work as catalysts for change in environments, institutions and people What factors hinder change When change is deemed beneficial In the second part of this volume the authors turn their attention to the issue of peace education. They examine the types of problems that societies and scholars should identify and try to solve in hopes of building more peaceful environments. The final chapter is a biography honoring Professor Gavriel (Gabi) Salomon, a significant contributor to the vast literature on change. This book is appropriate reading for professors, students and academics who are dedicated to fostering change to benefit institutions, environments and people.

Mineral Resources, Economics and the Environment Oct 17 2022 Written for students and

professionals, this revised textbook surveys the mineral industry from geological, environmental and economic perspectives. Thoroughly updated, the text includes a new chapter on technology industry metals as well as separate chapters on mineral economics and environmental geochemistry. Carefully designed figures simplify difficult concepts and show the location of important deposits and trade patterns, emphasising the true global nature of mineral resources. Featuring boxes highlighting special interest topics, the text equips students with the skills they need to contribute to the energy and mineral questions currently facing society, including issues regarding oil pipelines, nuclear power plants, water availability and new mining locations. Technical terms are highlighted when first used, and references are included to allow students to delve more deeply into areas of interest. Multiple choice and short answer questions are provided for instructors online at [www.cambridge.org/kesler](http://www.cambridge.org/kesler) to complete the teaching package.

Philosophy of Science for Biologists Oct 25 2020 A short and accessible introduction to philosophy of science for students and researchers across the life sciences.

**Educational Alternatives in Latin America** Feb 09 2022 This book explores diverse contemporary paradigms of educational praxis and learning in Latin America, both formal and non-formal. Each contributor offers a unique perspective on the factors which lead to the production of paradigms rooted in 'other' logics, cosmologies, and realities, and how these factors may renegotiate and redefine concepts of education, learning, and knowledge. The various chapters provide a road map for scholars, activists, artists, students, organizations, and social movements to help begin to construct learning spaces that seek to engage with a new more horizontal form of participatory democracy.

**The Effects of Genetic Hearing Impairment in the Family** Jun 01 2021 There has been an

explosion of studies in the field of genetic hearing impairment in the past decade, associated with major advances in our understanding of the mechanisms and conditions involved. However, a recent review has highlighted the very limited number of studies on the effects of such hearing impairment on the individuals and families of those concerned. In *The Effects of Genetic Hearing Impairment in the Family*, under the aegis of the European Union GENDEAF programme, the editors have taken the first steps to address this deficit in our knowledge and understanding of this topic. The book addresses the problem by secondary analyses of existing large scale population studies, by prospective investigation of individuals with a family history of hearing impairment and by specific studies on patients with otosclerosis and neurofibromatosis 2 and their families. In addition several chapters look at the specific impact of deaf culture, ethnicity and religion on reactions to deafness and the specific needs in genetic counselling. This book represents an important first step in this field and should be an invaluable resource for all professionals involved with people with hearing impairments.

**Urban Waste and Sanitation Services for Sustainable Development** Jul 22 2020 Urban sanitation and solid waste sectors are under significant pressure in East Africa due to the lack of competent institutional capacity and the growth of the region's urban population. This book presents and applies an original analytical approach to assess the existing socio-technical mixtures of waste and sanitation systems and to ensure wider access, increase flexibility and ecological sustainability. It shows how the problem is not the current diversity in waste and sanitation infrastructures and services and variety of types and scales of technology, of formal and informal sector involvement, and of management and ownership modes. The book focuses instead on the lack of an integrative

approach to managing and upgrading of the various waste and sanitation configurations and services so as to ensure wider access, flexibility and sustainability for the low income populations who happen to be the main stakeholders. This approach, coined "Modernized Mixtures", serves as a nexus throughout the book. The empirical core addresses the waste and sanitation challenges and debates at each scale - from the micro-level (households) to the macro-level (international support) - and is based on the results of a five-year-long interdisciplinary, empirical research program. It assesses the socio-technical diversity in waste and sanitation and provides viable solutions to sanitation and waste management in East Africa. This book provides students, researchers and professional in environmental technology, sociology, management and urban planning with an integrated analytical perspective on centralized and decentralized waste and sanitation configurations and tools for improvement in the technology, policy and management of sanitation and solid waste sectors.

Models of Teaching May 20 2020 Models of Teaching: Connecting Student Learning with Standards features classic and contemporary models of teaching appropriate to elementary and secondary settings. Authors Jeanine M. Dell'Olio and Tony Donk use detailed case studies to discuss 10 models of teaching and demonstrate how they can be connected to state content standards and benchmarks, as well as technology standards. This book provides readers with the theoretical and practical understandings of how to use models of teaching to both meet and exceed the growing expectations for research based instructional practices and student achievement.

**Management and Participation in the Public Sphere** Jan 16 2020 Public policy has a dynamic effect on multiple facets of modern society. Methods for managing and engaging the public sphere continue to change conceptually across the globe, impacting the ways that governments and citizens interact both within and across borders. Management and Participation in the Public Sphere is a definitive reference source for the latest scholarly research on the interplay of public affairs and the domestic realm, providing innovative methods on managing public policy across various nations, cultures, and governments. Featuring expansive coverage on a multitude of relevant topics in civic involvement, information technology, and modes of government, this publication is a pivotal reference source for researchers, students, and professionals seeking current developments in novel approaches to public policy studies. This publication features timely, research-based chapters on the critical issues of public policy including, but not limited to, archival paradigms, Internet censorship, media control, civic engagement, virtual public spaces, online activism, higher education, and public-private partnerships.

**The Research Interview** Apr 30 2021 Research and Qualitative Interviews brings into focus the

decisions that the interviewer faces by taking a data-led approach in order to open up choices and decisions in the process of planning for, managing, analysing and representing interviews. The chapters concentrate on the real-time, moment-by-moment nature of interview management and interaction. A key feature of the book is the inclusion of reflexive vignettes that foreground the voices and experience of qualitative researchers (both novices and more expert practitioners). The vignettes demonstrate the importance of reflecting on and learning from interactional experience. In addition, the book provides an overview of different types of interviews, commenting on the orientation and make-up of each type. Overall, this book encourages reflective thinking about the use of research interviews. It distinguishes between reflection, reflective practice and reflexivity. All the chapters focus on recurring choices, dilemmas and puzzles; offering advice in opening out and engaging with these aspects of the research interview.

Handbook of Rural School Mental Health Aug 03 2021 This handbook offers a comprehensive overview of school mental health (SMH) initiatives in rural areas in the United States. It offers clinical and administrative guidelines for innovative and effective programs addressing critical problems among rural youth and in areas where funding and resources are scarce. Chapters cover program development, implementation, sustainability, and evaluation; consider issues of community and policy support; address barriers to access and delivery; and debunk misconceptions about the region and its cultures. Chapters also discuss rural SMH applications relating to special populations, including students with autism, depression, anxiety, bipolar disorder, conduct disorders, and ADHD. In addition, the book examines the potential of school-based programs as a counter to the stigma and distrust of mental health services common to the region. Topics featured in the Handbook include: The value of rural SMH from an educator's standpoint. Preventing suicide among students

in rural schools. Substance abuse in rural school settings. Bullying and cyberbully among rural youth. Intergenerational patterns of mental illness in rural settings and their relevance for SMH. The importance of involving communities in culturally competent rural interventions. The Handbook of Rural School Mental Health is a must-have resource for researchers, scientist-practitioners, and graduate students in child and school psychology, educational psychology, social work/counseling, educational policymakers, pediatrics/school nursing, teaching, and teacher education.

**Making Play Just Right: Unleashing the Power of Play in Occupational Therapy** Nov 13 2019

At the heart of Making Play Just Right: Unleashing the Power of Play in Occupational Therapy is the belief that the most effective way to ensure pediatric occupational therapy is through incorporating play. The Second Edition is a unique resource on pediatric activity and therapy analysis for occupational therapists and students. This text provides the background, history, evidence, and general knowledge needed to use a playful approach to pediatric occupational therapy, as well as the specific examples and recommendations needed to help therapists adopt these strategies.

*Animal Maltreatment* Mar 10 2022 Animal maltreatment includes physical or sexual abuse, neglect, or hoarding of animals, and all states have laws prohibiting various forms of animal maltreatment. About one-half have statutory provisions mandating or allowing courts to order forensic mental health assessments of individuals convicted of animal maltreatment offenses. Yet there are few resources on this topic for mental health and legal professionals and none that offer guidance for evaluations in animal maltreatment cases. *Animal Maltreatment* is the first book to provide an overview of animal maltreatment as a legal, clinical, and forensic issue. It offers guidance for mental health and legal professionals involved in the adjudication of animal maltreatment offenses, with a special focus on forensic mental health assessments in such cases. The book reviews the legal and

social contexts of animal maltreatment and then describes research-based and clinical knowledge within the area. It offers perspectives on social and clinical responses in animal maltreatment cases and describes prospects for an area of forensic mental health assessment focused specifically on the forensic evaluation in cases of animal maltreatment. This is the first book that brings together descriptions of the characteristics of those who maltreat animals, factors associated with animal maltreatment behaviors, information about the impact on the animals themselves, and evaluations of offenders to assist courts in decisions about their rehabilitation. *Animal Maltreatment* will be of great benefit and interest to general and forensic psychologists, psychiatrists, and social workers, as well as lawyers, legal scholars and students, veterinarians, humane law enforcement professionals, and others involved in animal welfare advocacy.

**Current Topics in Developmental Biology** Aug 23 2020 *Current Topics in Developmental Biology* provides a comprehensive survey of the major topics in the field of developmental biology. These volumes are valuable to researchers in animal and plant development, as well as to students and professionals who want an introduction to cellular and molecular mechanisms of development. The series has recently passed its 30-year mark, making it the longest-running forum for contemporary issues in developmental biology. Includes many descriptive figures Topics covered include Wnt signaling, controlling regulatory networks, cartilage growth plates, and more Latest volume in the series that covers seven reviews in 300 pages

*Musicians and their Audiences* Dec 07 2021 How do musicians play and talk to audiences? Why do audiences listen and what happens when they talk back? How do new (and old) technologies affect this interplay? This book presents a long overdue examination of the turbulent relationship between musicians and audiences. Focusing on a range of areas as diverse as Ireland, Greece, India, Malta,

the US, and China, the contributors bring musicological, sociological, psychological, and anthropological approaches to the interaction between performers, fans, and the industry that mediates them. The four parts of the book each address a different stage of the relationship between musicians and audiences, showing its processual nature: from conceptualisation to performance, and through mediation to off-stage discourses. The musician/audience conceptual division is shown, throughout the book, to be as problematic as it is persistent.

**The Oxford Handbook of Clinical Psychology** Mar 30 2021 The exponential growth of clinical psychology since the late 1960s can be measured in part by the extensive literature on the subject. The field has come to be defined as much by its many topics as its many voices. The Oxford Handbook of Clinical Psychology synthesizes these decades of literature in one volume. In addition to core sections on topics such as training, assessment, diagnosis, and intervention, the handbook includes chapters devoted to emerging issues in the clinical field, including health care reforms, cultural factors, and technological innovations and challenges. Each chapter offers a review of the most pertinent literature, outlining issues and identifying possibilities for future research.

*Microbiomics and Sustainable Crop Production* Aug 15 2022 Highly detailed resource covering microbiome research, new omics, and gene editing technologies and approaches Microbiomics and Sustainable Crop Production presents an overview of the current state of the art in microbiome

research, discussing many new technologies and approaches in order to bridge knowledge gaps between field and lab experimental systems. New and emerging strategies to improve the survival and activity of microbial inoculants are covered, including the use of selected indigenous microbes, optimizing microbial delivery methods, and taking advantage of modern gene editing tools to engineer microbial inoculants. The two highly qualified authors address new molecular tools and powerful biotechnological advances, providing readers with knowledge of the complex chemical and biological interactions that occur in the rhizosphere and ensuring that strategies to engineer the rhizosphere are safe, beneficial to productivity, and result in improvements to the sustainability of agricultural systems. The relationship between phyllosphere microbial communities and functional traits of plants is also explored. Finally, approaches and priority areas for future research on phyllosphere microbiology are suggested. Specific sample topics covered in this comprehensive resource include: Transmission modes of bacteria and fungi and the nature of their interactions in the endosphere Characteristics of 'core microbiomes', which may be deployed to organize otherwise uncontrollable dynamics of resident microbiomes Model microbiome-plant systems, as well as the stability, resilience, and assembly of agricultural microbiomes Engineering and management of agricultural microbiomes for improving crop health, including reasons to modify plant microbiomes Microbiome research in the omics era and new efforts and challenges in assigning functions to microbes For students of plant biotechnology, agricultural sciences, and agricultural engineering, along with researchers working in related fields, *Microbiomics and Sustainable Crop Production* is an important resource to understand many complex modern ideas related to the subject and how they can be applied to practical applications.

**Neuroethics in Practice** Oct 05 2021 Neuroethics is concerned with the wide array of ethical, legal

and social issues that are raised in research and practice. The field has grown rapidly over the last five years, becoming an active interdisciplinary research area involving a much larger set of academic fields and professions, including law, developmental psychology, neuropsychiatry, and the military. *Neuroethics and Practice* helps to define and foster this emerging area at the intersection of neuroethics and clinical neuroscience, which includes neurology, neurosurgery, psychiatry and their pediatric subspecialties, as well as neurorehabilitation, clinical neuropsychology, clinical bioethics, and the myriad other clinical specialties (including nursing and geriatrics) in which practitioners grapple with issues of mind and brain. Chatterjee and Farah have brought together leading neuroethicists working in clinically relevant areas to contribute chapters on an intellectually fascinating and clinically important set of neuroethical topics, involving brain enhancements, brain imaging, competence and responsibility, severe brain damage, and consequences of new neurotechnologies. Although this book will be of direct interest to clinicians, as the first edited volume to provide an overall comprehensive perspective on neuroethics across disciplines, it is also a unique and useful resource for a wide range of other scholars and students interested in ethics and neuroscience.

Searching for Authenticity Nov 06 2021 Volume 2 of the Research in Careers series focuses on the search for authenticity in one's career. Although there has been growing interest in the topic within the popular press, relatively little academic research has been completed on authenticity and careers. Researchers are still refining the concept of authenticity and are just beginning to investigate how it influences the enactment of careers in today's turbulent career landscape. This volume offers the first organized effort on the topic. This volume contains seven chapters which examine the search for authenticity derived from the Kaleidoscope Career Model (Mainiero &

Sullivan, 2006). Chapters 1 and 2 present a review of the literature and an in-depth analysis of the construct of authenticity. Chapter 1 offers a new lens to view career authenticity based on two dimensions of self-awareness and adaptability. Chapter 2 uses two case studies to define how individuals are authentic in their career. Chapters 3 and 4 examine the authenticity of individuals in different career stages, with Chapter 3 examining recent college graduates and Chapter 4 examining mid to late stage careerists. Chapters 5, 6 and 7 focus on the interplay between social interactions and career authenticity. Chapter 5 offers a process model that traces how, through negotiation, a person's identities shape and are shaped by relationships with others, leading to the enactment of an authentic career. Chapter 6 explores how individuals remain authentic in their career while negotiating the conflicting expectations of multiple interest groups. Chapter 7 examines the complex relationships among career authenticity, political behaviors, and strain.

**Markers of Psychosocial Maturation** Apr 18 2020 This book advances an integrative approach to understanding the phenomenon of psychosocial maturation. Through a rigorous, dialectically-informed interpretation of psychoanalytic and humanistic-existential-phenomenological sources, Mufid James Hannush distils thirty essential markers of maturity. The dialectical approach is described as a process whereby lived, affect-and-value laden polar meanings are transformed, through deep insight, into complementary and integrative meta-meanings. The author demonstrates how responding to the call of maturation can be viewed as a life project that serves the ultimate purpose of living a balanced life. The book will appeal to students and scholars of human development, psychotherapy, social work, philosophy, and existential, humanistic, and phenomenological psychology.

Qualitative Research in Clinical and Health Psychology Sep 23 2020 Why are qualitative methods so important to clinical and health psychology research? How do you decide which methods to use? Can you successfully combine qualitative and quantitative methods? Qualitative Research in Clinical and Health Psychology: - Features contributions from world-leading experts in the field - Includes chapters on issues, methodologies and methods often overlooked in qualitative research books, including psychoanalytic methods and discussions of culture and language - Uses a wealth of examples from research projects to show you how to apply the theory to real research This comprehensive textbook is the ideal guide for anybody who wishes to develop their understanding of qualitative methods and to learn how to apply them in clinical and health psychology.
